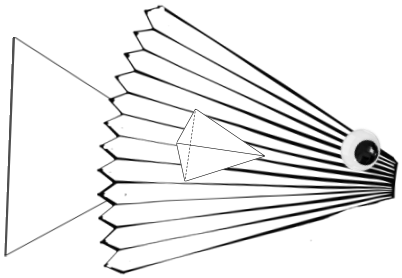
FISH CRAFT

Instructions for goldfish:

1. Cut out square and triangle for goldfish #1.
2. Fold the square paper in about .5-1 cm folds (accordion style: flipping the paper back and forth to make an accordion).
3. Fold that accordion in half. Glue the two inner sides together to create a fan-shaped triangle.
4. Position the Tail: Decide where you want your fish in the bowl. Glue the flat triangle (the tail) onto the bowl surface first, pointing it toward where the back of the fish will be.
5. Glue the accordion-fold body over the front edge of the flat triangle to complete your goldfish.
6. Glue a googly eye near the front point of the triangle and gently fold and glue the fin to the body.
7. Repeat to make the goldfish #2.



Step #3: Fold & glue together to create a fan-shaped triangle.
